

ICTR Resources Relevant to Disparities and Community-Engaged Research

Collaborative Center for Health Equity (CCHE) – HSLC 4230

CCHE's infrastructure supports health equity and disparities research being conducted across the ICTR partner schools/college, in collaboration with multiple community based partners across WI. Contact if require support in:

- Navigating campus oversight systems associated with conducting community engaged research
- Obtaining education and training in the conduct of health disparities/equity research
- Engaging diverse community partners.

Client Services Center – HSLC 2112

The center provides access to resources and services under ICTR that facilitate the design, implementation, dissemination and translation of research. Investigator support is provided via staff with expertise in:

- Community-academic partnership building
- Clinical trials
- Career development
- Biostatistics
- Health Sciences IRB
- Research education

Contact if you seek consultation in designing a study, locating sources of health data, identifying research partners (campus or community-based), writing proposals or manuscripts, disseminating your results, or if you would like to arrange a presentation about UW research resources for department, center or institute audiences.

Community Health Connections

The CHC provides a *platform* to promote ideas and projects that will influence Type 2 translational and community-based research being conducted at UW-Madison and across the state. CHC has 4 regional offices (Madison, Milwaukee, Northern WI and Northeast WI) to encourage ongoing conversations between academic researchers and community-based organizations about researchable ideas. Contact if you seek to conduct clinical or translational research in collaboration with community-based clinicians or organizations.
