

Plan to Quit Tobacco

Healthy Tips & Ideas

Tobacco use is one of the leading causes of cancer, especially lung cancer. In Wisconsin, lung cancer is one of the most common cancers for both men and women.

Tobacco increases your risk of getting other types of cancers. Tobacco also increases your heart rate and blood pressure. Tobacco includes snuff, smoking and chewing tobacco.

Quitting takes hard work, but the first step is planning to quit. To make a plan to quit, follow these simple tips:

Get ready Set a date to quit and stick to it!

Talk to your health care provider

There are medications that can help you quit. Talk to your health care provider to see if medication is right for you.

Get support and encouragement Make a list of why you want to quit and share it with friends and family. Support from friends and family can help you quit.

Change your routine Changing your behavior can help you quit. Exercising can help reduce your stress. Keep yourself busy. Drink lots of water. Avoid alcohol.

Plan rewards You should plan fun things to do to celebrate quitting and to keep you motivated. You will also have extra money since you won't be buying tobacco products.

Be prepared for the challenge Quitting can be difficult for many people. Remember you are improving your health by quitting.

My quit day is: _____

Medication(s) that I will use:

Contact information for people who will support and encourage me trying to quit: _____

Instead of using tobacco, I will:

My reward for quitting tobacco will be: _____
